

(a) Oprl1 and Glp1r co-detection
nodose neurons on the NodoMap UMAP

(b) Oprl1 against Glp1r, per nodose cluster
Spearman rho = 0.01, $p = 9.7e-01$ ($n = 21$)

(c) Oprl1 against Cckar, per nodose cluster
Spearman rho = -0.14, $p = 5.3e-01$ ($n = 21$)

(d) The association survives depth and cluster control
